

## Trex® Artisan Series Railing™

RAILING SYSTEMS

**A. Top and Bottom Rails** — Traditional white styling brings an elegance to any deck. The anti-vibration design adds to the solid, comfortable feeling of being on a Trex® deck.

**B. Rail Gaskets** — Easily set between railing and posts, rail gaskets enhance the finished look of your deck. Slim design is just enough to hide any gap at connections.

**C. Balusters** — Carefully designed with both aesthetics and strength in mind, balusters will easily fit into railing channels.

**D. Baluster Spacers** — Baluster spacers easily snap into top and bottom rail, giving the balusters precise spacing.

**E. Rail Post** — Decorative rail posts are constructed with a 6 x 6 sleeve that fits over a standard 4 x 4 post.

**F. Post Cap** — Decorative two-piece crowns add detail and integrity to each rail post.

**G. Post Skirt** — Decorative skirts slide over each post, resting on the surface of the deck.

**H. Support Bracket** — Innovative bracket design permits easy rail installation at various angles.

**I. Assembly Tool** — This simple tool is the key to an easily constructed, elegant deck.

Trex® Artisan Series Railing™ reflects a thoughtful design where appearance and quality are paramount.

It's a bold and dignified look for those who want to set their deck apart — a classic white railing set against a natural wood-tone deck. Our composite Artisan Series Railing™ sets the standard for aesthetics, whether you choose the traditional look of white balusters or the contemporary look of glass paneling. Crafted from a durable PVC composite, Trex® Artisan Series Railing has a lightly textured surface that is welcoming to the touch and enhances the elegant appearance of the deck. Seamless design and immaculate attention to detail make Trex Artisan Series Railing a quality addition to any deck.

### **Elegance you can rely on.**

**EASY ASSEMBLY** – precisely tooled to fit together quickly for the do-it-yourselfer or contractor.

**LOW MAINTENANCE** – durable, weatherproof composite is easy to keep clean.

**FINISHED QUALITY** – innovative design prevents vibrations, squeaks and rattles.

**SAFETY** – sturdy railing system lends additional safety in the outdoor environment.
